Supply Check List

Use this list to ensure you have the supplies needed to operate your practice safely and efficiently. Because of the increase in demand for masks and other infection control products, some items may be out of stock, and it is a good idea to add yourself to wait lists where available. When purchasing supplies, be cautious of counterfeit or “gray market” goods. If it’s too good to be true, it probably is.

- Anesthetic
- Barrier film
- Bibs
- Cape, disposable or reusable for patient
- Chair sleeves
